the seca doctor scale

new

- User-friendly because it was specially designed for use in medical practices.
- Impressive long service life. Robust quality production with an innovative design.
- Double display for taking readings simultaneously from various positions.
- Customized label for individual personalization available.

seca 874 dr:

Robust scale with an appealing design.

The doctor scale seca 874 dr is specially designed for use in medical practices. Equipped with an LCD display that is readable from two directions and the comfortable foot switch makes this flat scale an ideal tool for any medical facility. It is light enough that it can be used in multiple exam rooms and robust enough that its performance capability can be enjoyed for years. It is a true seca quality product.

Precise results.

A modern medical device like the seca 874 dr cannot be compared with a conventional personal scale. The specially developed doctor scale is subject to the strictest requirements during its production process, has a user-friendly design, and delivers reliably precise data. A special extra feature is the more than impressive price-performance ratio.

Helpful functional diversity.

The LCD display that is readable from two different directions is the optimal solution for monitoring measured values. The buttons on the front for switching it on and off can be operated by foot and are therefore guaranteed to be easy on the back. It is also possible to weigh infants stress-free using the optional mother/child-function. These features combined with a compact and modern design make the seca 874 dr the ideal doctor scale.

Individually personalized.*

A good name is earned through quality and modern functionality. That is why the seca 874 dr has been labeled the "doctor scale". It indicates the value of the product while reflecting the professionalism of the user. The label gives users certainty about the precision of the measured values and can be exchanged for personalized messages. Further information can be found at www.seca.com/doctorscale.

The flat construction and non-slip tread make it stable and comfortable to step onto.

The custom label serves to provide individual personalization.

The two buttons on the front side of the scale can be easily operated by foot.
